

1. Redirect	Common API for loading, saving, and deleting redirects
2. File Entity	Provides interfaces for managing files
3. Ctools	A set of APIs and tools to improve the developer experience
4. Pathauto	Automatically generates URL/path aliases for various kinds of content
5. Wysiwyg	Supports any kind of client-side editor including HTML editors (a.k.a. WYSIWYG), pseudo-editors (buttons to insert markup into a textarea)
6. Rules	Allows site administrators to define conditionally executed actions based on occurring events
7. Media	An extensible framework for managing files and multimedia assets
8. Variable	Provides a registry for meta-data about Drupal variables
9. Panels	Allows a site administrator to create customized layouts for multiple uses

10. Devel	Helper functions for Drupal developers and inquisitive admins
11. Menu block	Provides configurable blocks of menu links with advanced features not available in Drupal 8 core.
12. I18n	Collection of modules to extend Drupal core multilingual capabilities (D7)
13. Block Class	Allows users to add classes to any block through the block's configuration interface
14. Strongarm	Gives site builders a way to override the default variable values that Drupal core and contributed modules ship with
15. Menu attributes	Allows you to specify some additional ***** for menu items such as id, name, class, style, and rel
16. Honeypot	Deters spam bots from completing forms on your Drupal site
17. LoginToboggan	Offers several modifications of the Drupal login system in an external module
18. Nodequeue	Allows users to collect nodes in an arbitrarily ordered list

19. Feeds Tamper	Provides a small plugin architecture for Feeds to modify data before it gets saved
20. Login Destination	Allows you to customize the destination that a user is redirected to after logging in
21. Paragraphs	Allows you — Site Builders — to make things cleaner so that you can give more editing power to your end-users
21. Security Review	Automates testing for many of the easy-to-make mistakes that render your site insecure
22. Password Policy	Provides a way to enforce restrictions on user passwords
23. Security Kit	Facilitates certain mitigations for Cross-site Scripting, Cross-site Request Forgery, and Clickjacking, among other issues
24. Coffee	Helps you to navigate through the Drupal admin faster
25. Rabbit Hole	Adds the ability to control what should happen when an entity is being viewed at its own page

26. Entity Browser	Powerful entity reference widget
27. Web Components	An emerging web industry standard to replace layout systems, not template engines, not endless tpl files

Instructions

Simply print these sheets out, multiple times if you are working in teams or with several individuals.

1. Cut along the lines so you have 27 Module names and 27 orphan statements.
2. Mix them all up.
3. Ask the participants to match statements to Module names.
4. Have fun!
